

WCS QUICK PROPOSAL #1213.... ADDENDUM #1

PPE & Related Products

From: WCS Purchasing Dept.

Released Sunday, May 31, 2020

This addendum serves to help clarify certain terms and conditions related to WCS QP #1213... Unless otherwise noted within this addendum, all other terms, conditions, and specifications of QP #1213 shall remain the same.

This project is not a Hard Bid that is based solely and strictly on low bid without consideration to other important factors. WCS is structuring this project to seek and implement best proposal(s) as determined by WCS. We certainly do seek low and competitive costs for PPE supplies and low cost will be weighted. Additionally, WCS seeks lowest and best proposal(s) meaning best quality, features, availability, and sales support that are all in the best interest of WCS - as evaluated and determined solely by WCS. These value added considerations are more subjective in nature and at the discretion of WCS.

This project is a fast tracked quick proposal project that for obvious reasons include but are not limited to: Emergency pandemic situation, serious supply chain constrictions, WCS' need to quickly establish, vet and approve Tier II PPE providers. Therefore, we will attempt to quickly evaluate proposals and WCS will subjectively determine as best possible best solutions to meet the needs of our school district.

There have been severe supply and demand challenges for PPE supplies over the last 70+ days. Our goal is to allow this quick proposal process to vet and qualify dealers and facilitate ordering and delivery of good PPE supplies at good competitive rates. Companies with reliable, dependable and local (preferably Williamson County) support & infrastructure to facilitate WCS orders and deliveries at low, competitive rates will be prioritized - as best determined by WCS.

WCS has been overwhelmingly contacted over the last 30+ days by voluminous and constant requests from companies seeking to sell PPE supplies in our school district. It is simply impractical to accommodate every request. This WCS QP #1213 project is a fair and competitive process to address the matter. If you disagree or object to the approach that we have described in this emergency quick and good faith process to meet the needs of WCS - then simply do not participate in this project. Otherwise, we certainly look forward to all potential proposals.

IMPORTANT --- At the bottom section of your proposal cover sheet (attached) describe in less than 80 words in total for both items listed below:

- Your company's local presence, sales support and beneficial infrastructure to best serve WCS.
- And provide your company's product (in stock order to delivery) fulfillment assurance process to best serve WCS.

This is important information to aid WCS in our decision process.... All proposals must provide this ADDED information as a result of this ADDENDUM #1.... Any proposal that fails to provide this added information --- will be disqualified.

We welcome your participation! Thank you for your consideration, interest and support of WCS.
