Addendum II
WCS RFB #1332
RELEASE DATE: Monday November 27, 2023

Note: The bid opening date remains the same Thursday, November 30, 2023 at 10:30 am.

IMPORTANT NOTE TO POTENTIAL BIDDERS

WCS received a question from a potential bidder concerning the availability of “7 mil tinted exterior security film” from a manufacturer.

Bidders Question: Do you have a product and manufacturer that produces a 7 mil or thicker exterior TINTED security film? None of the major manufacturers produce a film that meets this spec.

WCS ANSWER: There are numerous global manufacturing facilities that will produce and make security film, clear or tinted to any size of mil needed. It will be the bidder’s responsibility to find a source that will accommodate these needs. WCS has completed similar projects in the past and have had no issues in getting the required 7 mil tinted security film to fit the exterior application.

However, if a bidder/contractor wishes *not to obtain the required “exterior 7mil tinted security film” from a manufacturer*, it will be required that the awarded bidder/contractor use a multilayer application such as a “clear 5 mil security film” with a “2 mil tinted security film overlay” on those exterior areas.

The double layer method will be acceptable in those areas where the exterior “7 mil tinted security film” is required. It should also be noted that only certain areas of the building will require the exterior tinted application.

Under no circumstances should an awarded bidder/contractor use an interior film for an exterior application.
