

Start Using the App Today

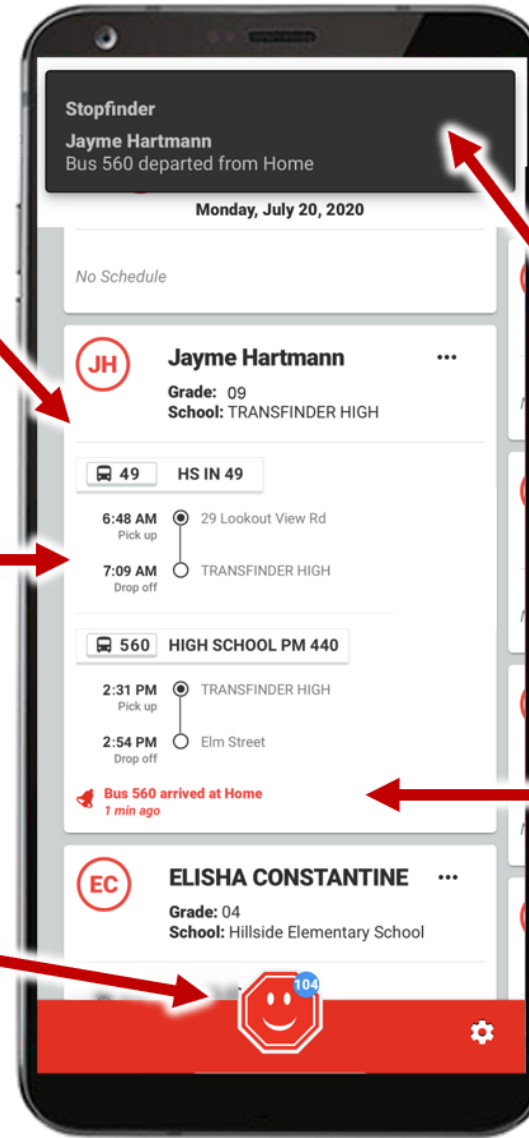

1. Activate your subscription
 - An invitation email will be sent from the Transportation Department
 2. Install the Stopfinder app
 3. View your student's schedule & share your student's schedule with caregivers
1. Create GeoAlerts to be notified when the bus is arriving or departing any location along your student's route
 2. Easily and securely communicate with your Transportation Department

See student's schedule for any day of the year

Vehicle, Trip and Stop information. Including transfer trips and alternate site stops

Access Announcements and Messages

Receive real-time notifications based on student's GeoAlerts

View previous notification on each student's card

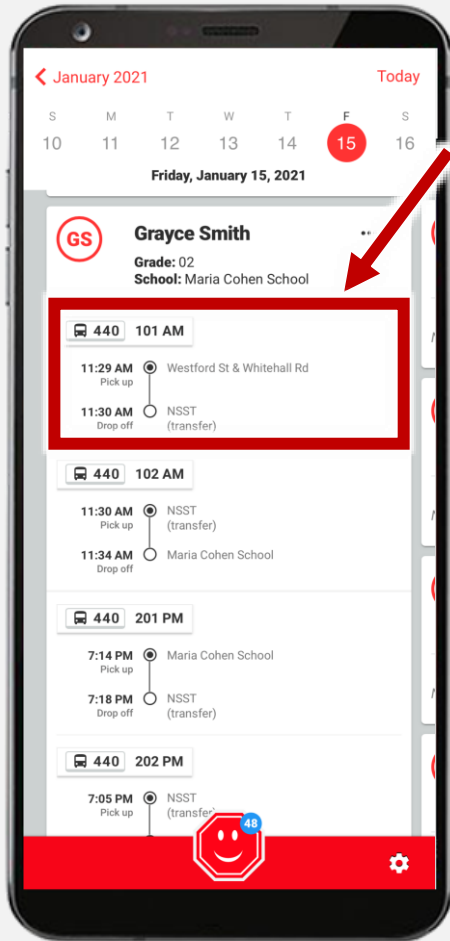

The schedule screen states vehicle location is unavailable. In the map it takes up to one minute for the system to find the bus and send the data to your phone. Select the dots to the right of the student's name to add another parent or caregiver to your account. See page 2 to set up Geo Alerts and follow the bus on the map.

With GeoAlerts, create alert zones anywhere on the map to receive GeoAlert notifications when the bus arrives or departs from the alert zone. Multiple GeoAlerts can be added by selecting the bell in the bottom right corner.

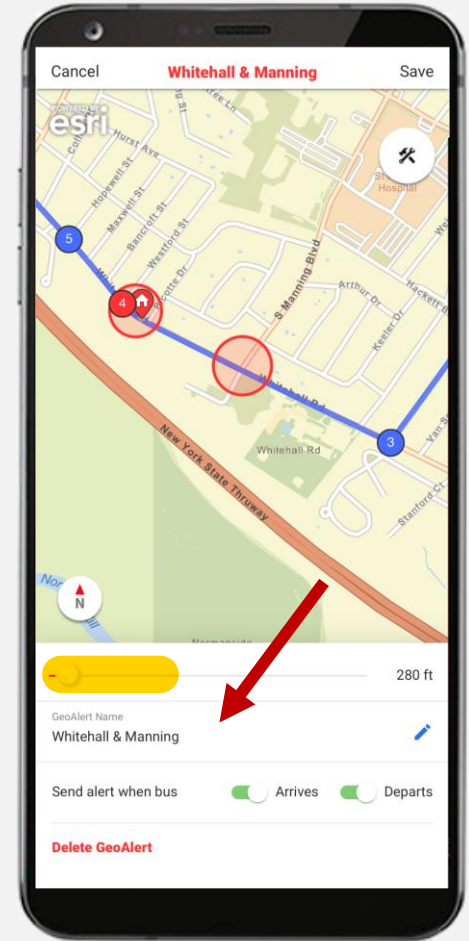

Tap the student's schedule to open the map where you can add a new GeoAlert

Tap the GeoAlert button at the bottom of the map and select 'Add GeoAlert' from the GeoAlerts menu

Name the new GeoAlert and tap Save

Move the map to position the GeoAlert circle a few minutes away from the stop, use the slider to increase the size, and select when to receive the phone notification

Repeat process for additional alert zones!
